

Quality Policy

At Biomed Global, we are committed to raising the quality of healthcare and facilitate medical breakthroughs in Southeast Asia. We achieve this by continuously seeking out innovative, world leading healthcare solutions while actively developing our expertise and abilities. We have adopted this quality policy to govern the actions and behaviours of every stakeholder within our group. The guidelines of the quality policy are as follows:

- We will continuously seek out the latest, proven and the most effective products & technologies to support healthcare professionals, biomedical experts, researchers, scientists and customers in Southeast Asia.
- We will strive to maintain the quality of our products and services, and most importantly, exceed the needs & expectations of our customers.
- We will continuously improve our business operations and effectiveness of our management system for us to be a thought leader in our field of expertise.
- We will ensure our business complies with the industry's regulatory and statutory requirements.
- We will ensure integrity, honesty and conscience are reflected in our business, and that every individual upholds the company's core values.
- Our quality objectives will be reviewed and enhanced to align with the strategy set for the financial year and whenever necessary, to support our business goals.

Ng Boon Thiam
